

We are on the do not call list. Do not stop this. Before this list was started we were inundated with phone calls for products, services and charities that we had no intention of getting products from or contributing dollars to. It gave us a margin of safety. In this area of identify theft, the public doesn't need or want unsolicited phone calls. I for one would not take the product based on an unsolicited phone call. I will vote any representative in either state or federal government out of office if I see that they are instrumental in repealing this law.
